

Aggregate Tech Subcommittee (PM) – Meeting Minutes  
August 19<sup>th</sup>, 2020  
1:00 to 3:00 PM

1. Update from the field? How is the specification working?
  - a. Difficult to enforce specification in urban areas around utilities and intersections. Consider adding restrictions on using the specification in urban settings.
  - b. In past few months, bid items were listed by the ton instead of each.
  - c. **Action-** conduct cost comparison for projects with and without base compaction bid items.
  
2. FDM updates
  - a. Implementation plan presented
    - i. Short term - Increase number of projects. Minimum tonnage of 10,000 tons.
    - ii. Long term – add to standard specification.
  - b. **Action-** revise guidance in FDM for how to estimate the number of layers for base compaction.
  - c. **Action** – draft guidance about how to set-up lots for staged construction; how to estimate quantities for certain types of typical sections.
  
3. Corrective action area – No comments
  
4. Shoulders are 2<sup>nd</sup> in the staging process – No comments
  
5. Project Training?
  - a. Include base compaction in potential aggregate inspection training program.

**Action** - The next subcommittee will start working on drafting specification language for Part 7 of the standard specification on December 15<sup>th</sup>.

**Action** – Revise C.2.5.1 Contractor Required Quality Control (QC) Testing section to include minimum lot width
