

## CONCRETE PIPE AND PRECAST PRODUCTS

### Certified Producer Plants

Materials from the companies listed herein are pre-qualified for use on Wisconsin Department of Transportation projects in accordance with all applicable specifications and/or policy memoranda.

CATEGORY A - CONCRETE PIPE PRODUCTS

CATEGORY B - MANHOLES, INLETS, CATCH BASINS

CATEGORY C - BOX CULVERTS, WALL PANELS, TEMP. BARRIERS

CATEGORY D - CONCRETE BRICK/BLOCK, RETAINING WALL BLOCK

### Requirements for Inclusion on WisDOT Pre-qualified List for Concrete Pipe and Precast Elements:

**Department Pre-Qualification** - WisDOT pre-qualification is required to be placed on the Department's list of approved fabricators for Concrete Pipe and Precast Elements. On an annual basis, each plant shall provide required documentation by the date below. WisDOT also conducts annual Quality Verification audits on selected production facilities. QV audits also inform the following year's approval.

**Audit Requirements** - Initial or continuing approval to fabricate any given item requires that a full-scale sample of at least one product type within that item's Category to be available for inspection during the qualifying third-party audit. The qualifying third-party audit must occur during the calendar year prior to the year for which approval is sought. Sample(s) must have been manufactured within the 18 months prior to the third-party audit, at the plant seeking approval. Every approved plant placed in operation during any given year must receive a QV audit during that year, regardless of whether product is delivered to WisDOT. Intermittent operations are required to contact the Department to coordinate a QV audit during production.

**Notification Requirements** - The plant must contact the department regarding plant name changes, ownership changes, plant certification disqualification by the third-party certifier, primary contact changes, plant closings, or any other issues related to the pre-qualification requirements.

**Statement on Material Acceptance** - For materials in Categories A, B, & C, see quality control test frequency requirements in the plant certification form below. Materials in Categories B, C, & D are accepted based on quality control data as required below and by the applicable Special Provision. Compliance of approved vendors with Title 23 CFR 635.410 "Buy America" is managed as part of the approval process; no documentation specifically for Buy America needs to be collected at the project level for materials covered by these lists.

**Application documents must be submitted electronically using DocuSign. DocuSign applications will be available on December 15th, 2023. To get the application DocuSign form, please contact BTS Concrete Engineer Aleksandra Graff at [aleksandra.markovicgraff@dot.wi.gov](mailto:aleksandra.markovicgraff@dot.wi.gov).**

**Application for 2024 calendar year will be due on February 29th at 5pm.**

**Department Contact : Please direct all inquiries and email all application materials to:**

Precast Concrete  
Bureau of Technical Services  
Wisconsin Dept. of Transportation  
3502 Kinsman Blvd.  
Madison, WI 53704
