- Jeff Smith, P.E.
 - Consultant Project Manager, Jewell Associates Engineers, Inc.
- Dave Koepp, P.E.
 - WisDOT Northwest Region Project Supervisor

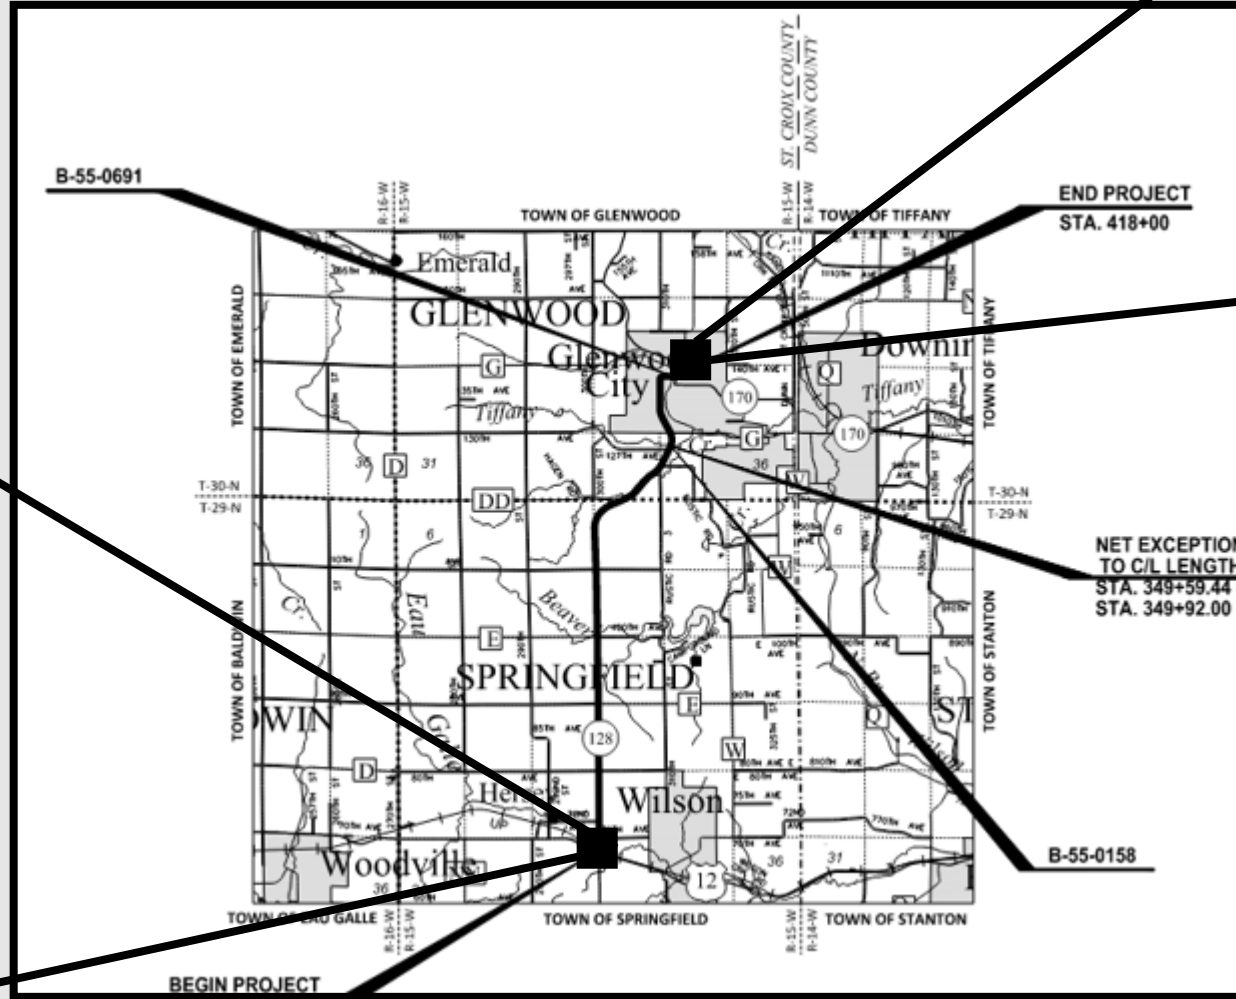

Agenda

- Project Limits
- Purpose and Need
- Design Overview
- Construction Staging
- Recent Activities
- Schedule
- Contact Information

Project Limits

Purpose and Need

- Pavement distress

- Substandard guardrail

Design Overview

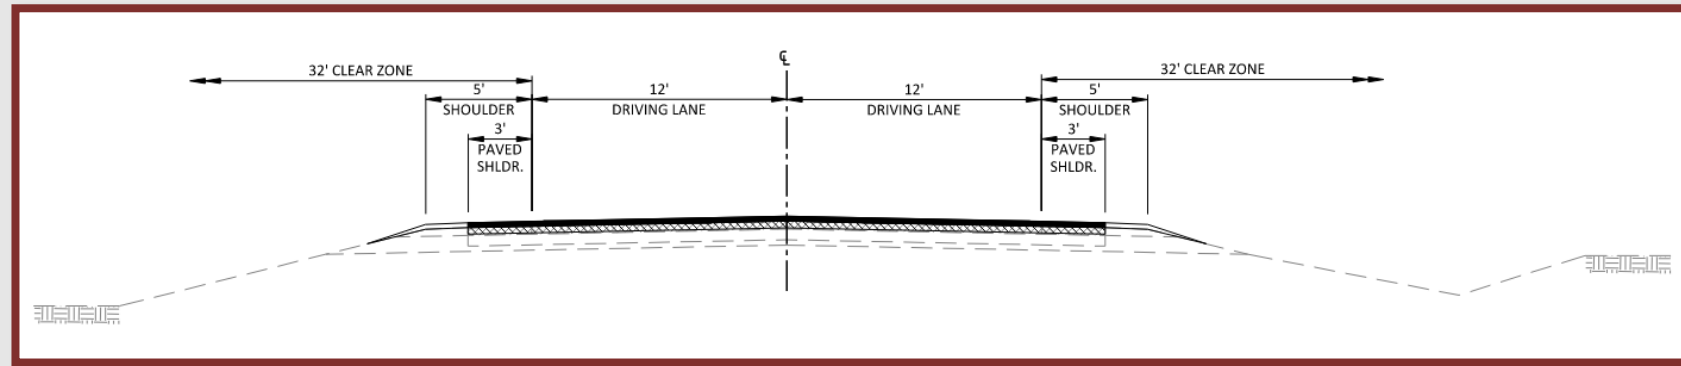

- Improving the pavement
 - Recycling 3.75 inches of pavement and paving 2.75 inches from US 12 to Glenwood City
 - Milling 3.25 inches of pavement and paving 3.25 inches in Glenwood City
- Replacing guardrail
- Cleaning or replacing existing culvert pipes
- Replacing sidewalk curb ramps
- Placing centerline rumble strips and pavement markings
- Overlaying the deck of the bridge in Glenwood City

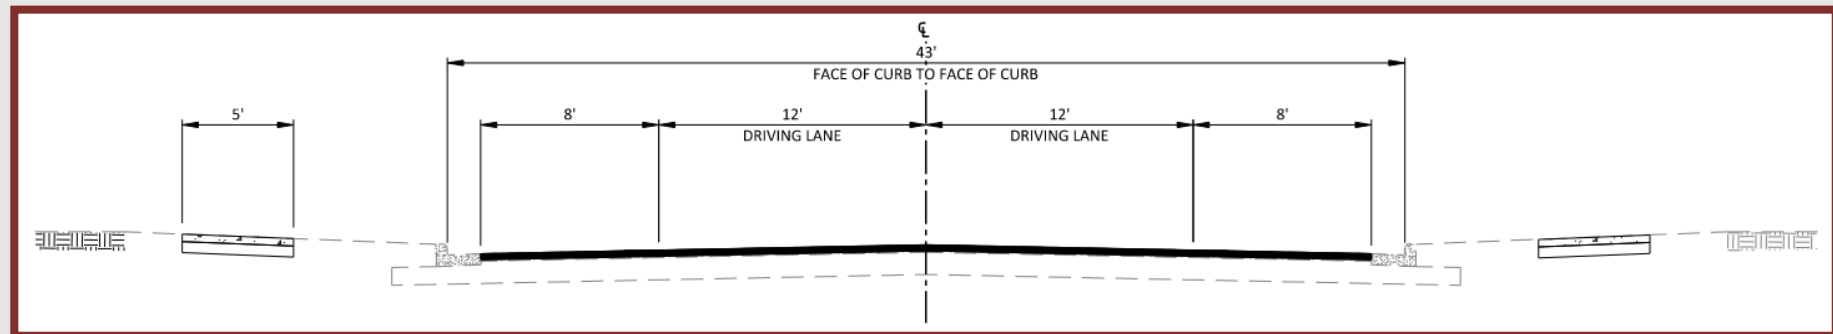

Design Overview

Typical Sections of WIS 128

- Rural

- Urban

Construction Staging

- Impacts in rural area (US 12 to Glenwood City)
 - Paving and grading operations will result in single-lane closures controlled by flagging.
 - Culvert pipe replacement will result in short-term closure of the road, with traffic being detoured.
 - Guardrail replacement will result in shoulder closures.

Construction Staging

- Impacts in urban area (Glenwood City)
 - Paving operations will result in single-lane closures controlled by flagging.
 - Bridge work might result in the structure being open to a single lane of traffic controlled by temporary traffic signals.
 - Curb ramp replacement will result in sidewalk closures and a pedestrian detour.

Recent Activities

- 2021
 - Survey completed
- 2022
 - Initial agency coordination completed.
 - Preliminary plans completed.
 - Draft environmental document completed.

Schedule

- Environmental report signed
- Final plan submittal
- Construction

July 2023

August 2025

Spring 2026
