

What is an Access Management Plan?

- Series of maps that:
 - ✓ Present one desirable plan for ultimate access conditions
 - ✓ Illustrate intersection spacing below current desirable standards
 - ✓ Indicate potential future intersection types (Type A, B2, etc)
 - ✓ Help property owners and municipalities understand future WisDOT access expectations
 - ✓ Highlight specific areas that require further study (concepts maps)

What are these concepts?

- Potential improvements to help manage, preserve, and extend the safety and mobility of the highway
 - ✓ Improve deficient geometric standards
 - ✓ Increase safety
 - ✓ Improve future delay concerns
 - ✓ Increase facilities for bicyclists and pedestrians where appropriate
 - ✓ Address municipal concerns
 - ✓ Start the conversation about the future of WIS 16

These concepts are for discussion purposes

They provide a starting point for ultimate planning of the highway
