

Mazomanie – US 12 (WIS 78 to US 12)

WIS 19, Dane County Rehabilitation Project Anticipated 2022 Construction

Project Location

The pavement rehabilitation of WIS 19 begins just east of the WIS 78 intersection in the town of Mazomanie and ends just west of the US 12 intersection in the town of Springfield. The total project length is approximately 9.6 miles. (See reverse side for a project location map.)

Project Need

The purpose of this rehabilitation project is to improve the existing deteriorated pavement, address substandard vertical and horizontal curves, and upgrade the shoulders to current WisDOT Standards

Proposed Improvements

This project will consist of two different improvement types, reconstruction and resurfacing. The resurfacing sections will mill the existing pavement and pave 4 inches of asphalt pavement. The reconstruction sections will remove the existing pavement and subbase and replace with 16 inches of select crushed material, 12 inches new subbase, and 4.5 inches of asphalt pavement. The proposed typical section for WIS 19 consists of 11-foot travel lanes in each direction with a 6-foot-wide shoulder (3-feet paved) from WIS 78 to CTH K. The section from CTH K to US 12 will consist of 11-foot travel lanes with a 6-foot-wide shoulder (5-feet paved).

Additional WIS 19 roadway improvements include the following:

- Upgrading select horizontal and vertical curves.
- Upgrading select intersections to current geometric standards.
- Replacing two bridge structures.
- Replacing existing guardrail to current standards.
- Protecting existing roadside hazards within the roadway clear zone.
- Rehabilitating select roadway culvert pipes.
- Replacing existing signing and pavement markings.
- Installation of a pedestrian crossing at Indian Lake Park

Temporary and permanent right-of-way acquisitions are anticipated throughout the length of the corridor to accommodate the proposed roadway improvements. The Real Estate acquisition will likely start in Fall of 2019.

Construction Schedule

The project is currently expected to begin construction in 2022. During construction, WIS 19 will be detoured and closed to through traffic within the project limits (open to local traffic only).
