

Wisconsin Department of Transportation

DTSD - SW REGION
2101 Wright Street
Madison, WI 53704-2583

FACT SHEET

WIS 92

Project ID: 5606-03-00/70

Mt Horeb – Brooklyn

East Ave to US 14

Dane & Green County

October 2020

Project Limits

The location of the project is the 13.13 miles of WIS 92 from East Avenue in Belleville to US 14 east of Brooklyn.

Purpose

The purpose of this project is to maintain safe and efficient travel on WIS 92 to ensure the roadway continues to serve as a local and region link in the transportation system.

Project Concept

The project includes a 2-inch mill and overlay for the 13.13 miles of roadway in order to extend the pavement service life. Centerline rumble strips will be added to the rural portions to address crash flags. The existing curb ramps will be updated to current Americans with Disabilities Act (ADA) standards where necessary. The new asphalt surface will be striped using epoxy pavement marking and grooved wet reflective epoxy edge lines. Beamguard will be repaired where needed. Asphalt kickouts will be removed and replaced with gravel at gravel driveways and field entrances. No structure work is anticipated.

Traffic Impacts

WIS 92 will be reduced to one lane with flagging operations and shoulder closures may be necessary during construction.

Schedule

Environmental Report - **October 2020**

Right of Way Plat - **August 2021**

Real Estate Acquisition (Curb Ramp Locations) - **August 2021**

Plans Completed - **August 2023**

Construction Begins - **Summer 2024**
