*Replace entire section titled **Black Earth Electric** with the following:*

Black Earth Electric has existing overhead and underground distribution facilities located approximately from Station 327+00 to the end of the project with an underground crossing at approximately Station 374+75 LT

Any placement of beam guard within the limits of Black Earth Electric's underground electric facilities will require the contractor to adjust the location of the beam guard posts to avoid their facilities.

There is no direct conflict anticipated as a result of this project with the existing utility facilities.

Schedule of Items

Attached, dated November 2, 2016, are the revised Schedule of Items. All pages of the Schedule of Items are being replaced.

Plan Sheets

The following 8½ x 11-inch sheets are attached and made part of the plans for this proposal:

Revised: 106.

The responsibility for notifying potential subcontractors and suppliers of these changes remains with the prime contractor.
